NuQuip®

Model QD Series High-Pressure Quick Disconnects

- Pressures up to 60,000 psi (4,137 bar)
- Valved and non-valved versions
- Unique self-locking design
- Minimal pressure drop
- Multiple port and seal options
- Optional handle eases automated coupling and de-coupling

DESCRIPTION

The patented NuQuip® Model QD Series High-Pressure Quick Disconnect coupling is designed for applications with working pressures up to 60,000 psi (4,137 bar). Standard port options are either medium pressure or high-pressure, with a variety of other ports available depending on the application.

These couplers are offered in either a valved or non-valved version. The high-flow check valve design allows for minimal pressure drop. The self-locking design increases operator safety in portable hand tool applications.
